Profile

Software Engineer with 4+ years of experience delivering production web applications for industrial operations, insurance, and SaaS. Strong in React, Next.js, and TypeScript, with experience leading frontend architecture and a team of 6 developers, shipping multi-tenant products, and integrating LLM APIs into business workflows.

Experience

ABA Technology — Remote, Morocco
Full-Stack Engineer — Sep 2024 – Present

Fusion AI Analytics Studio, Fullstack Engineer — Nov 2026 – Present

- Building a library of reusable, custom D3 (SVG) visualization widgets that extend Analytics Studio beyond its native charts, designed to serve multiple clients rather than a single use case.
- Integrated the widgets into the platform's plugin architecture using typed configurations, manifest metadata, and Module Federation, so they are reusable across dashboards without touching the core charting system.

Tech: React, TypeScript, D3, Vite, Module Federation

Connected Workers, Frontend Engineer to Frontend Lead — Sep 2024 – Nov 2026

Digital factory operations platform replacing paper-based workflows, deployed at plants in Tangier and Kenitra.

- Owned the frontend end to end for a 4-module platform with 64+ routable pages covering logistics documents, attendance, crew management, training, and overtime, within a 17-person team.
- Led 6 developers: set up the Next.js architecture, a reusable component library, and a normalized page structure that made new pages fast to build; ran code reviews, mentored developers, and introduced ESLint and Jest practices.
- Built a React Flow workflow editor (approval, document, and notification nodes), dynamic forms, REST API integrations, and authentication flows.
- Delivered responsive interfaces for desktop and factory tablets, and built about half of the pages directly while supporting teammates' deliverables.

Tech: Next.js, React, TypeScript, Zustand, TanStack Query, React Flow, React Hook Form, Zod, Jest

ConstruFlow
Full-Stack Engineer (*independent construction SaaS*) — Apr 2026 – Present

- Designed, built, deployed, and maintain a production multi-tenant SaaS for construction companies, live with 2 paying clients: 28 screens covering projects, quotations, invoices, suppliers, subcontractors, workers and attendance, vehicles and transport, bank and cash tracking, and financial dashboards.
- Built an AI-assisted Excel/CSV import with the Claude API that maps clients' own spreadsheet columns to the data model, with mapping confirmation and a preview before anything is saved, so clients can bring in years of existing records without a fixed template.
- Isolated each client's data with PostgreSQL Row Level Security and role-based permissions; delivered English, French, and Arabic interfaces with RTL support.

Tech: Next.js, TypeScript, Supabase, PostgreSQL, Claude API

InsureBT — Casablanca, Morocco
Frontend Engineer — Apr 2023 – Sep 2024

- Led the migration of 2 large insurance platforms (vehicle, dental, and health) from legacy React/Node to Next.js and Node LTS with 2 developers over about 6 weeks, as the only team member with Next.js experience.
- Replaced deprecated dependencies and removed unused code and pages, producing a lighter, better-performing application.
- Worked in a 10-developer team with BAs and managers; supported deployments on Ubuntu servers with load balancing.

Tech: React, Next.js, TypeScript, Redux, MUI, Node.js

Earlier experience

Freelance Full-Stack Developer, Botticelli Web | Feb – Apr 2023: built iOS/Android apps with React Native and React web apps on a Laravel/MySQL back end.

Freelance Full-Stack Developer, Kubicbit (formerly Pull4YOU Services) | Aug 2022 – Feb 2023: built a transportation-service web app with React, Redux, and REST APIs.

Software Development Intern, Hirschmann Automotive | Mar – Aug 2022: built a cross-platform Flutter app for technician interventions with Firebase auth and realtime data; UI designed in Adobe XD.

Education

Engineering Diploma, Automation and Computer Engineering, EMSI, Rabat | 2022 (3-year program)

Honoris United Universities Certificate | 2022

Technical Degree, Electromechanical Automated Systems, Institute of Applied Technology (ISTA), Tangier | 2019 (2-year program)

Skills

Frontend and Visualization: React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, MUI, D3, React Flow, Zustand, Redux, TanStack Query, React Hook Form, Zod

Backend and Data: Node.js, Supabase, PostgreSQL, Row Level Security, REST APIs, Laravel, MySQL, Java/Spring Boot

AI Integration: Claude API, LLM-assisted schema mapping, prompt-based data mapping

Engineering and Tools: Frontend architecture, design systems, reusable components, SSR/CSR, Module Federation, performance optimization, Jest, ESLint, Prettier, Husky, Git, GitHub, GitLab, Jira, Agile/Scrum
