EDUCATION

- Engineering Diploma – Automation & Computer Engineering**
EMSİ – Moroccan School of Engineering Sciences, Rabat
- Technical Degree – Electromechanical Automated Systems**
Institute of Applied Technology, Tangier

LANGUAGE

- Arabic (Native)
- English (Full Professional Proficiency)
- French (Full Professional Proficiency)

CORE SKILLS

- React, Next.js (App Router), TypeScript, JavaScript (ES6+)
- State Management: Zustand, Redux, React Hook Form, Zod
- UI & Design Systems: Tailwind CSS, Shadcn UI, MUI
- Architecture: Frontend Architecture, Design Systems, Reusable Components, SSR/CSR, Performance Optimization.
- Workflow & Visualization: React Flow
- Quality & Tooling: ESLint, Prettier, Husky, Jest unit testing, linting & formatting automation
- Collaboration: Git, GitHub, GitLab, Jira, Agile/Scrum

PROFILE

Frontend Engineer with 4+ years of experience building scalable React and Next.js applications. Experienced in frontend architecture, reusable component systems, performance optimization, and mentoring developers while leading frontend technical decisions on enterprise-scale projects.

EXPERIENCE

ConstruFlow – Construction PM SaaS | Personal | April 2026 – Present

- Designed and built a multi-tenant construction PM web app end-to-end in my free time (Next.js, Supabase, TypeScript), while employed full-time elsewhere.
- Delivered a live product used by a real client company: projects, quotes, advances/invoices, suppliers, subcontractors, workforce attendance, and logistics expenses in one place.
- Implemented role-based multi-company data isolation (RLS), bilingual EN/FR UI, and a financial dashboard (advances, expenses, net income, cash balance).
- Own ongoing product work post-launch: feature updates, client-driven improvements, bug fixes, and performance hardening as the client continues to use the system.

Frontend Engineer | Frontend Lead Responsibilities– ABA Technologie
Remote, Morocco | September 2024 – Present

-Frontend Engineer Lead responsibilities (2025–Present):

- Built and owned the frontend architecture from scratch, ensuring scalability and long-term maintainability.
- Led frontend code reviews and maintained high code quality across the project.
- Mentored frontend developers and established best practices across the team.
- Designed reusable component libraries that accelerated development across multiple modules.
- Led implementation of complex workflows, dynamic forms, and interactive visualizations using React Flow.
- Defined frontend standards through linting, testing, and coding conventions.
- Worked closely with backend, QA, product, and design teams to deliver scalable features.

-Frontend Engineer (2024-2025):

- Built the initial frontend architecture, reusable templates, and application foundation.
- Developed reusable UI components, page templates, and project wide patterns.
- Translated Figma designs into scalable, production-ready interfaces.
- Integrated REST APIs, authentication flows, and optimized client-side performance.
- Maintained application stability through refactoring, debugging, and performance improvements.
- Established the project's testing foundation using Jest to support long-term maintainability.
- Technologies: Next.js 16, React, TypeScript, Zustand, React Hook Form, Zod, Tailwind CSS, Shadcn UI, React Flow, Axios, Jest.

Frontend Engineer – InsureBT

Casablanca, Morocco | April 2023 – September 2024

- Developed and maintained multiple enterprise insurance applications.
- Built responsive and accessible interfaces with a strong focus on user experience.
- Identified and resolved frontend bugs and performance issues across large codebases.
- Contributed to the migration of the company's main application from React to Next.js, modernizing the architecture and improving performance, routing, SEO, and long-term scalability.
- Improved rendering performance and application responsiveness.
- Collaborated closely with backend and QA teams, working in Agile sprints using GitLab and Jira.
- Technologies: React, Next.js, TypeScript, Redux, Context API, HTML5, CSS3, JavaScript (ES6+), GitLab, Git, Jira, MUI

Freelance - Full-Stack Engineer- Botticelli Web

Casablanca, Morocco | February 2023 - April 2023

- Front-end development for iOS/Android mobile applications using React Native, as well as for web applications with React.js.
- Setting up the back-end using Laravel PHP, XAMPP, Postman, and MySQL database management.
- Project monitoring and management with Slack, Jira, and BitBucket for effective team communication.
- Technologies: React, React Native, Laravel, PHP, MySQL, Bitbucket

Freelance - Full-Stack Engineer - Pull4YOU SERVICES S.A.R.L,
Casablanca, Morocco | August 2022 - February 2023

- Design and development of a web application for a transportation service.
- Engaging user interfaces with React.js and React Hooks.
- Precise application state management with Redux.js.
- Efficient CRUD operations for data management.
- Close collaboration within the development team.
- Skillful source code management with Git and GitHub and Task and sprint management with Trello.
- Rigorous testing and feature validation using Postman.
- Technologies: React, Redux, REST APIs, GitHub

Internship - Computer and Automation Engineer - HIRISHMANN AUTOMOTIVE
Rabat, Morocco | March 2022 - August 2022

- Built a cross-platform Flutter/Dart mobile app for technician interventions, with Firebase auth & realtime data, UI designed in Adobe XD.
- Technologies: Flutter, Dart, Adobe XD, Firebase
